

15th May,

My dear Krishnan,

A few weeks ago I was in Bangalore and saw Dr Balaraman from who I got some news of you. Since then I have been meaning to write to you. The other day Handa said you were thinking of coming back in not too distant a future.

I am very interested in people versed in membrane biology and chemistry who are willing to apply themselves to problems of nervous system and developmental biology. I have liked your attitude to science and I could offer you a position here. You are familiar with the kind of people and interests we have and it should be easy for you to decide whether you will fit

in with us or not. If you are interested do let me know. Even if you aren't, write and tell me how you are getting along and what are you doing.

When do you actually plan to come back?

All the best,

Faheem Ali  
D. Ph.D. (Physics)
